AMENDMENTS TO THE CLAIMS

- 1.-4. (Canceled)
- 5. (Currently amended) A method for regenerating <u>a</u> mammalian tissues or organs <u>lens</u> comprising the steps of:
- (a) surgically opening an organ or tissue eye in order to be regenerated said lens, producing

dedifferentiated cells;

- (b) contacting said dedifferentiated cells of step (a) with an amount of guanosine, effective for transdifferentiation thereby causing transdifferentiation of said dedifferentiated cells produced in step (a);
- (c) contacting said cells from step (b) with an amount of beta-carotene effective for stabilization thereby causing stabilization of transdifferentiated cells produced in step
 - (b); thereby producing stabilized, transdifferentiated cells.
 - 6.-7. (Canceled)
 - 8. (Currently amended) The method of claim 7 5 wherein said agent is administered by a route selected from oral, enteral, by inhalation, topical, by aerosol and rectally orally.
 - 9.-13. (Canceled)
